### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 November 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains the following patentably distinct species of the claimed invention:

Species A, drawn to a back light device as shown in Figure 3 and described in the specification [0024] through [0028] that is not a mesa type.

Species B, drawn to a back light device as shown in Figure 4 and described in the specification [0029] through [0031] that is a mesa type.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. As a courtesy, examiner recommends amendment of claims to correct certain deficiencies:

a. It is respectfully pointed out that the preamble of claim 1 is confusing. It is difficult to determine what is actually claimed; is it a plate structure, a back light module, or a guide light source structure (which lacks antecedent basis) ? Examiner recommends clearly stating what it is and thereafter maintaining the same wording; do not paraphrase.

b. Claims 3 and 6 contain the recitation "elements are substantially on a same surface". However, each is in its own individual notch and cannot be "on a same surface". Please clearly state what is claimed regarding "same surface".

c. The preamble of claim 4 is more clear than claim 1, but it is not clearly a claim to an alternate species or the same species. To avoid restriction as a different invention (as opposed to a different species), examiner recommends using the same corrected preamble for both (all) base claims.

d. Examiner recommends claiming a back light for a display. Broadly claiming a back light forces the office to consider all conceivable devices that could reasonably be considered to be a back light regardless of its application. Please consider "back light" is jargon in display art, but it is not so constrained without a reference to use in displays.
